

AI Forge Activation & Data Governance

Activate Microsoft 365 Copilot with the governance that enterprise risk teams require.

Microsoft 365 Copilot uses existing access making oversharing, EEEU exposure and unmanaged SharePoint sites become immediate AI risk. Risk and compliance teams need proof Copilot is governed before it scales. AI Forge Activation + Data Governance provides that evidence using Microsoft Purview and SharePoint Advanced Management, aligned to Microsoft's Secure-and-Govern blueprint.

How it works

1. Discover

Content, data & compliance risk baseline

2. Activate

Copilot agent live, analytics baseline

3. Govern

Modular governance blocks with measurable uplift

Activation: AUD \$7,500 (fixed) + Governance extensions scoped and quoted
